

Harshit Ranjan

Game Developer | Founder, Patliputra Games

Gujarat, India | harshitranjan4140p@gmail.com | harshitranjan.dev | [LinkedIn](#)

PROFESSIONAL SUMMARY

Game developer and entrepreneur with 3+ years of experience delivering 30+ projects for global clients. Focused on Unity/C#, multiplayer networking, physics-based gameplay, movement systems, and full-cycle game development.

EXPERIENCE

Founder & Game Developer

Current

Patliputra Games | Gujarat, India

- Lead product prototyping, gameplay engineering, technical art, and release planning for original games and reusable systems.

Freelance Game Developer

2021 - Present

Independent Contractor | Remote

- Developed and shipped 30+ game projects for international clients across mobile and desktop platforms.
- Built responsive multiplayer systems with Photon PUN 2, including state synchronization, client prediction, and lag compensation.
- Created custom physics, movement, procedural gameplay, animation, and interaction systems in Unity and C#.
- Managed projects from requirements and rapid prototypes through optimization, polish, and deployment.

EDUCATION

Integrated MSc in Information Technology (5-year program)

In progress

Gujarat University

Class 12 - Science (PCM, Computer Science)

Green Valley School for Children | Gandhinagar, Gujarat

TECHNICAL SKILLS

Engines & Networking	Unity, Unreal Engine 5, Photon PUN 2
Languages	C#, C++, JavaScript, TypeScript, Dart, SQL
Game Development	Multiplayer networking, physics, AI, animation systems, UI/UX, optimization
Art & Tools	Blender, Photoshop, Illustrator, Flutter

SELECTED PROJECTS

Parkour System

Unity | Physics | Movement

Reusable traversal system supporting climbing, wall-running, ledge grabs, and smooth state transitions.

Online FPS Multiplayer Shooter

Unity | Photon PUN 2 | Networking

Competitive FPS with real-time synchronization, client prediction, lag compensation, weapon systems, and lobbies.

Thief Long Hand Puzzle

Unity | Physics | Mobile

Published physics puzzle game featuring procedural stretchy-arm mechanics and hand-crafted obstacle layouts.

Ashes: RPG Adventure

Unity | Combat | AI

Action RPG prototype with hitbox-based combat, animation state machines, and environment-driven encounters.
